New waste-to-energy plant – City & JICA partnership

Opened on 4 November at City’s Kraaifontein Integrated Waste Management Facility (KIWMF) - will see roughly 500 kg of plastic converted to 500 litres of oil per day
Welcome to the Green Lease Library, a centralized site for commercial green leasing resources.

Green Lease Leaders

The Green Lease Leaders recognition program was created with support from Green Lease Library and contributing organizations. For more information on the program, visit [www.greenleaselibrary.com/green-lease-leaders.html](http://www.greenleaselibrary.com/green-lease-leaders.html).

What are Green Leases?

Green leases (also known as aligned leases, high performance leases, or energy efficient leases) align the

Associated Green Lease Leaders award

GREEN LEASE LEADERS

Creating sustainable landlord-tenant relationships.

Congratulations!

Congratulations to the 2015 class of Green Lease Leaders, some of which are shown here. Click here for more.

About the Program

Green Lease Leaders™ is a designation created to recognize companies or brokerage teams that successfully implement green lease language into new or existing leases.

While the concept of green leasing has been tested and discussed for years, there previously was no clear standard to define what constitutes a green lease, or which organizations were engaging in green leasing. The Green Lease Leaders program strives to move green leasing forward by simultaneously setting standards for what constitutes a green lease and recognizing leaders in the field.

The program was developed by the Institute for Market Transformation (IMT), with support from the Department of Energy’s Better Buildings Alliance.

Key Dates & Deadlines

- 2016 Green Lease Leaders Application Period Opens
- Fall 2015
