	4	SHARED-NETWORK CHARGE (SNC)		SNC for residential customers is calculated using the group-diversified maximum demand of the property in accordance with guidelines based on the principles of SANS 507-1.						
				In the case of a group housing development or block of flats, SNC is calculated on the sum of the group-diversified maximum demands of all the units plus the undiversified authorised capacity of the general supply, irrespective of the size of the bulk supply.						
				For commercial/industrial customers SNC is calculated on the authorised capacity for new connections and on the increase in authorised capacity for supply upgrades.
