					excl. VAT	incl. VAT		excl. VAT	incl. VAT	
	4	SHARED-NETWORK CHARGE (SNC)		SNC for residential customers is calculated using the group-diversified maximum demand of the property in accordance with guidelines based on the principles of SANS 507-1.						
				In the case of a group housing development or block of flats, SNC is calculated on the sum of the group-diversified maximum demands of all the units plus the undiversified authorised capacity of the general supply, irrespective of the size of the bulk supply.						
				For commercial/industrial customers SNC is calculated on the authorised capacity for new connections and on the increase in authorised capacity for supply upgrades.						
				Exempted: Beneficiaries of low cost housing developments, informal settlements, backyard dwellings, temporary supplies and customers listed as indigent as set out in the City's Credit Control and Debt Collection Policy. However, developers of formal Low Cost Housing are not exempted from payment of SNC. They are to include SNC in their state subsidy claim.						
	4.1	Shared-network Charge (SNC) for all connections:								
		Network Segment:								
FCR	4.1.1	High Voltage / 11kV	R/kVA		642.87	739.30	y	672.43	773.30	4.6%
