2025/26 Average Rates and Tariff increases

Eskom's increase to municipalities is 11,32%, the City's increase is 9.32 percentage points lower

Overview of Tariff changes

Tariff reform and Restructuring

Water

Fixed charges will now be determined by property value and not connection size.

Variable impact providing relief for households at lower end of income spectrum.

Sanitation

Introduction of fixed charge which will be offset by a reduction in the charges for sanitation volumes.

Energy

Average tariff increase only 2%. Service and Wires Charge for the Domestic category and Recovery of service and network charges via fixed cost.

City – Wide Cleaning

Change in the method in how customers will contribute to the funding of cleansing services. Offset by the reduced Electricity cost

Tariff restructuring reforms, with notable relief for lower income households

What does Energy services provide?

Qualify for lifeline electricity

- Monthly usage: (12-month average) must be below 450 kWh, includes free basic.
- Municipal property valuation must be less than R500 000.
- A prepaid electricity meter must be installed.

Change in funding methodology

City-wide Cleaning tariff vs Reduced energy charge

- ❑ The reduced electricity cost allowed for the change in the method of how City customers contribute to the funding of cleansing services through the City – wide Cleaning tariff;

However it should be noted that:

- ❑ **Eskom supplied areas will not see a reduction in the Energy charge.** These customer were previously subsidised considering the % contribution to Rates which City Energy supplied customers were paying, savings shown below:
