SURVEY ON THE INSTALLATION OF STREET LIGHTS WITHIN KOMMETJIE

The City of Cape Town's Public Lighting Development division receives requests for public road and street lighting across the Metro. These requests are assessed based on the City's mandate to provide public lighting, City policies, and applicable lighting quality standards.

Historically, Kommetjie has received minimal residential road and street lighting due to residents' preference for the area to remain predominantly unlit. However, the department acknowledges that times and requirements change, and the City must adapt when a verified need for change arises.

We invite you to join us at a meeting, where we will present information on street lighting and address any technical questions raised by the community.

Meeting details:

Date	Venue	Time
03 December 2024	Fish Hoek Civic Centre, Central Circle, Fish Hoek	18:30 - 19:30
