HOLIDAY PROGRAMME
JUNE - JULY 2025

PLAY. LEARN. MOVE

PROGRAMME OVERVIEW

The Department's 2025 winter holiday recreation programme is filled with lively and vibrant activities to ensure that holidays are action-packed and full of fun for children and youth! The programme provides an opportunity to safely enjoy netball, 5 aside soccer, board games, ball games, arts & craft as well as sports and games, whilst enhancing their skills and enjoying a different recreational learning environment. While the focus is on fun and positive engagement, it may have a friendly but competitive component.

The holiday programmes will be offered from **Monday 30th June** to **Friday 19th July 2025** at 45 City recreational venues across the City. These include mostly community centres, sport grounds and play parks. The programme offers a large variety of activities at these different facilities and public spaces, depending on the needs of the community and the creativity of the organising staff. Daily activities will begin anytime between 08:00 and end in the late afternoon, with some facilities ending activities as late as 16:30 to accommodate youth.

Events taking place during the holidays are linked to the holiday programme. This may be an event that culminates at the end of the holiday period such as a sport or games tournament. Children and youth who have participated in the holiday programme regularly participates in the recreational programme's event.

PROGRAMME OBJECTIVES

1. The primary aim of the Holiday programme is to provide a variety of customised, quality recreation programmes and sport activities for school-aged children and youth to participate in during the winter school holiday period.
2. The programme intends to keep children and youth physically active while also providing a safe space for them to participate in sport and recreation at Recreation and Parks Department facilities and public spaces.
3. The programme should be accessible to the most vulnerable communities through mobile units.
4. To promote the use of recreational spaces across the city by residents.
5. The programme aims to enhance social and cultural awareness and cohesion.

MEASURABLE OUTPUTS

The outputs of this programme include the following:

- The number of recreation facilities offering the programmes
- The number of children and youth attending the programme at each facility and across the department

¹ International guidelines recommend that children and adolescents aged 5-20 years achieve at least an average of one hour per day of moderate to high-intensity physical activity (mostly aerobic) across the week, or that high-intensity aerobic activities, as well as those that strengthen muscle and bone, should be included at least 3 days a week (WHO, 2020). While the holiday programme will consist of a variety of active and passive activities, the programme will also focus on keeping children and youth physically active by ensuring at least 45-60 minutes of moderate to vigorous intensity recreation activities is achieved on each day the programme is offered.
